

# *SlowMotion Zeta<sup>rs</sup>*

*Damped self-closing  
for 082 roller slides*

**SlowMotion Zeta<sup>rs</sup>** is a fully integrated damped self-closing mechanism and confers to the 082 roller slides a strong image boost. Conceived as true add-on solution, the optional usage allows an income increase of hardware distributors and of furniture manufacturers. The product is retrofit able to all usual heights and depth of drawers. Supplied in bulk for industrial use or in skin-pack kit with screws and drilling template for end-user assembly, it is the must have on drawers equipped with 082 roller slides.

### Many advantages:

- Easy to use add-on for drawers made in wood, chipboard or MDF
- Large market potential thanks to retrofit ability for existing installations
- Self closing with damping effect to confer high end feel to entry level drawers
- Silent drawer closing movement and guaranteed pull close of drawer
- Anti pinch safety for secure drawer closing
- Simple screw-on assembly on cabinet and drawer
- Use of one side only for small drawers
